

THE VENTURI 4-WEEK STOP-SMOKING SYSTEM

Now smokers can gradually quit smoking, without switching brands or even cutting down on the number of cigarettes they smoke.

The Venturi 4-Week Stop-Smoking System consists of four graded, cleanable filters, each one trapping more tar and nicotine than the previous one. The gradual, week by week withdrawal makes kicking the habit easy, or Venturi will issue a refund.

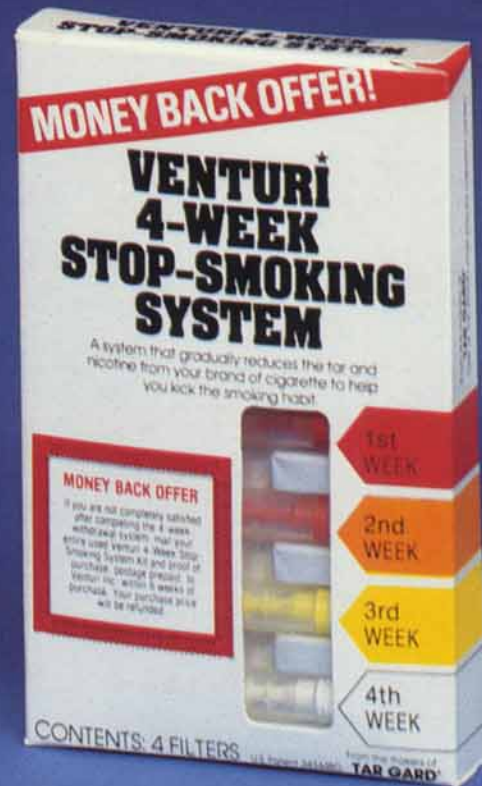

Those who prefer to keep smoking at the end of four weeks can continue purchasing the system for the benefits of reduced tar and nicotine, using the filter that best suits them.

MONEY BACK OFFER

If your customers are not completely satisfied after completing the 4-week withdrawal system, they can mail the entire used Venturi 4-Week Stop-Smoking System Kit and proof of purchase to Venturi (within 6 weeks of purchase) and we will issue a refund for the purchase price.
